## STORAGE TIPS

### Tip No1

#### MAKE A PLAN

Put the items you are going to need to access the least in the back and the ones you are going to access more frequently in the front. Get a slightly larger storage unit so you can make an aisle.

### Tip No2

#### PROPERLY PACK BOXES

1. Pack the heaviest items on bottom, the lightest items on top
2. Wrap all breakables in newspaper, foam or packing peanuts
3. Pack heavy items and books in small easy to carry boxes

### Tip No3

**LABEL  
ALL  
SIDES**

### Tip No4

#### GET DISCOUNTED BOXES & SUPPLIES

Don't pay full price for boxes and supplies, instead purchase everything you need from your local self storage at a discount.

### Tip No5

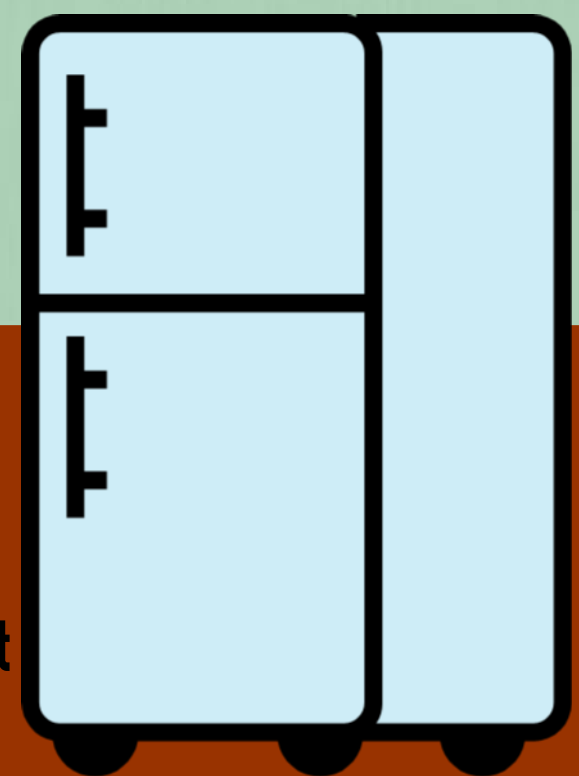

**STACK  
ITEMS  
HIGH**

Save space by stacking your boxes tall and utilizing all of your storage area. Store your couch and bed on their sides to make more space and save money.

### Tip No6

Defrost fridges and freezers before placing them in storage to prevent water damage. Tie the doors up before the move, but keep them slightly ajar when in storage to prevent condensation and bad odors.

### Tip No7

If you are storing items with fuel tanks like vehicles and lawn mowers, drain the tanks before placing them in storage. Also avoid storing hazardous materials in general.
